21 March 2000

Dear Sir

ADAMANT - PERMIT TO OPERATE - WAVE RISK ASSESSMENT

The recently submitted wave risk assessment sheets for this vessel are returned at enclosure. They have been reviewed here at Glasgow marine office and are considered to fulfil the requirements of the guidance issued to operators of DSC and HSC vessels.

It is now requested that final versions, preferably typed for clarity, are submitted as formal submissions and that in addition to the Master's signature they are countersigned by an Assessor either from within your organisation or an independent assessor as indicated by MIN 48(M+F) at paragraph 7.3.

Once finalised versions received, we will issue full term PTO as previously discussed.

Yours faithfully

Wally Waltho
Principal Marine Surveyor (Engineer)
Glasgow
